Get certified

Learning is one thing. But, the world and employers want to know you learned something.

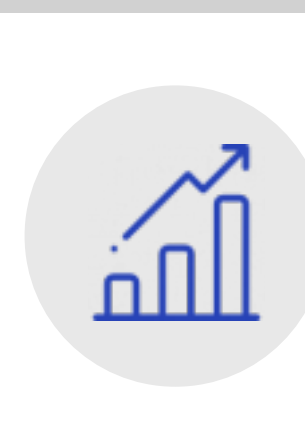

With KedzohDental you earn a Certificate upon successfully completing each course.

Earn more

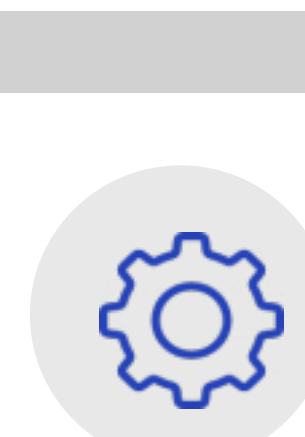

As everyone knows, the more you know, and the more education you have, the more you can earn.

Get certified at KedzohDental and show the world you've mastered the knowledge and earn more.

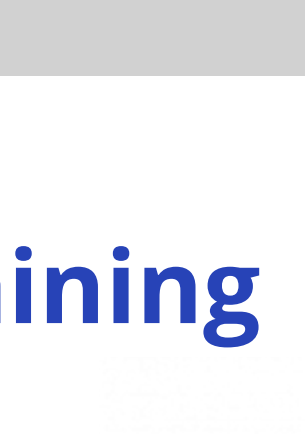

For Dental technicians and students

Knowing how to use the tools of your trade where never more critical as now when the entire dental industry is shifting to digital solutions. Do better work and increase your value to your customers and employers and get certified and earn more.

For Dental Labs and Milling Centers

Managing a highly qualified workforce has never been more critical. You've invested hundreds of thousands, if not millions, in scanners, CAD/CAM systems and milling machines. Find out **how to increase your productivity and quality by emailing us.**

For Resellers of CAD/CAM solutions

If you're a reseller of Exocad, iMetric, WorkNC or any other digital dental solution and are looking for a way to increase your revenues by offering more value to your clients **email us to find out more about our affiliate program.**

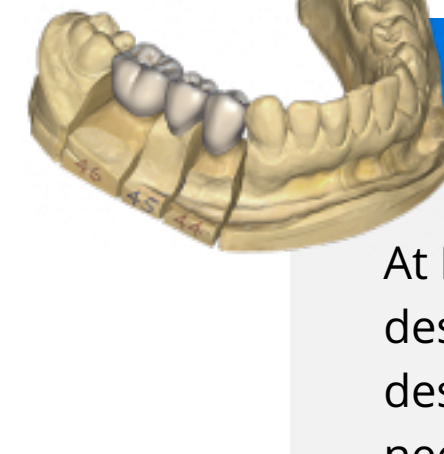

Exocad Level I training

You'll learn:

Learn how to properly import scanned files and set up your Exocad workspace for the most efficient workflow.

Learn how to use the wizard to quickly make crowns, bridges and implants.

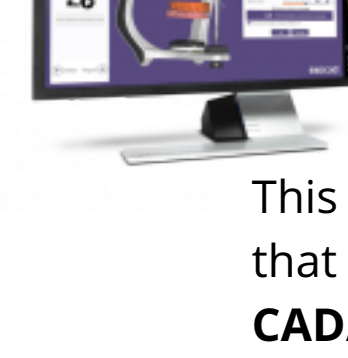

Learn to step out of the wizard and start using the true power of Exocad to design prosthetic solutions with full customization and make your customers smile.

What's in the Course?

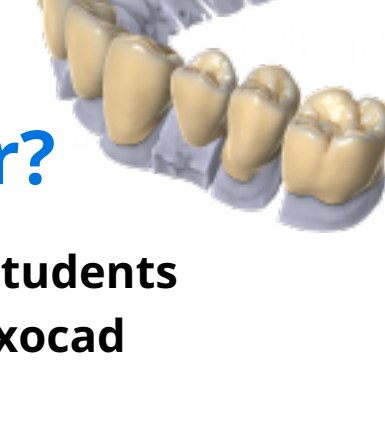

At **KedzohDental** each course is created and designed by recognized experts. Courses are designed to guide you through each step you'll need to complete a task. Furthermore, course content includes videos, presentations, audio recordings, and pictures - and we always use real patient cases.

And, at each step, you'll have quizzes to help you retain what you've learned. By the end, you'll have the knowledge you need to be more productive and better at what you do.

Who's the course for?

This course is for **dental technicians and students** that are new to **digital dentistry** and the **Exocad CAD/CAM** software solution.

This course is also for those with some experience using Exocad who realize that their initial training was superficial and recognize they **need to know the basics in order to become experts.**

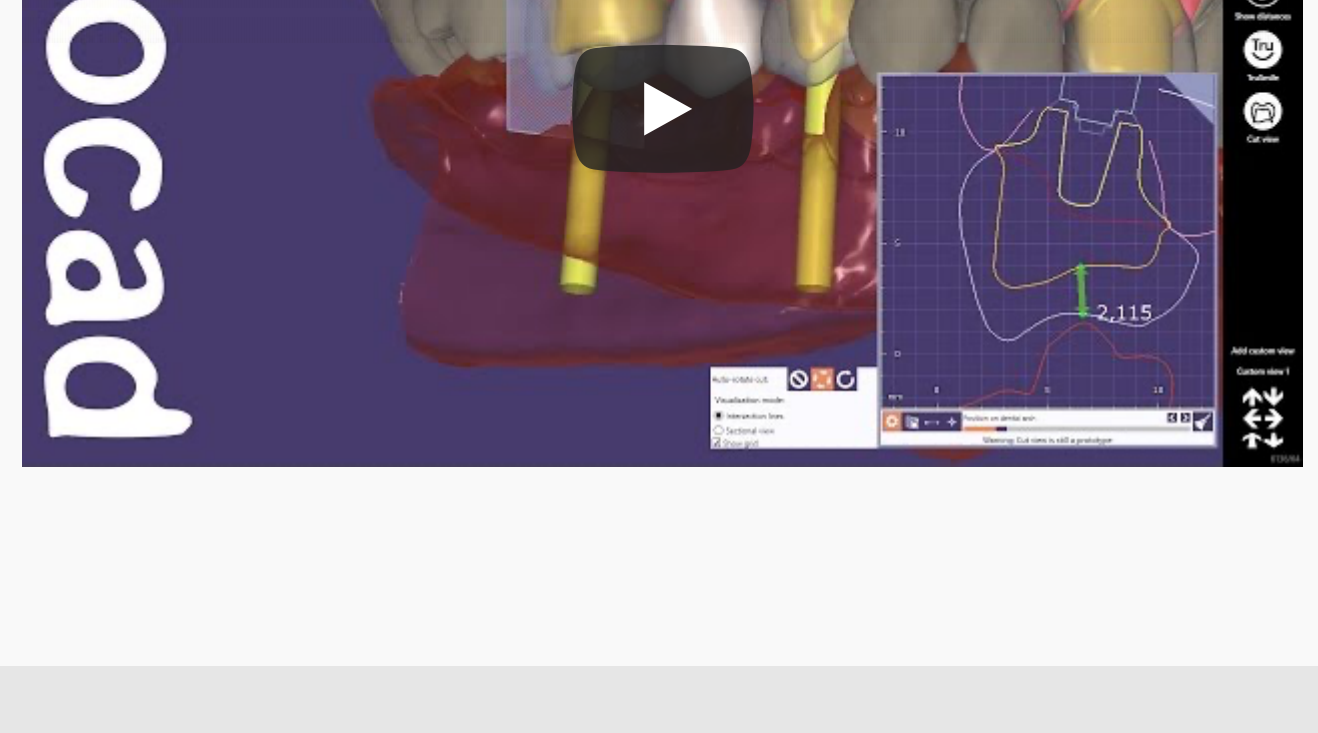

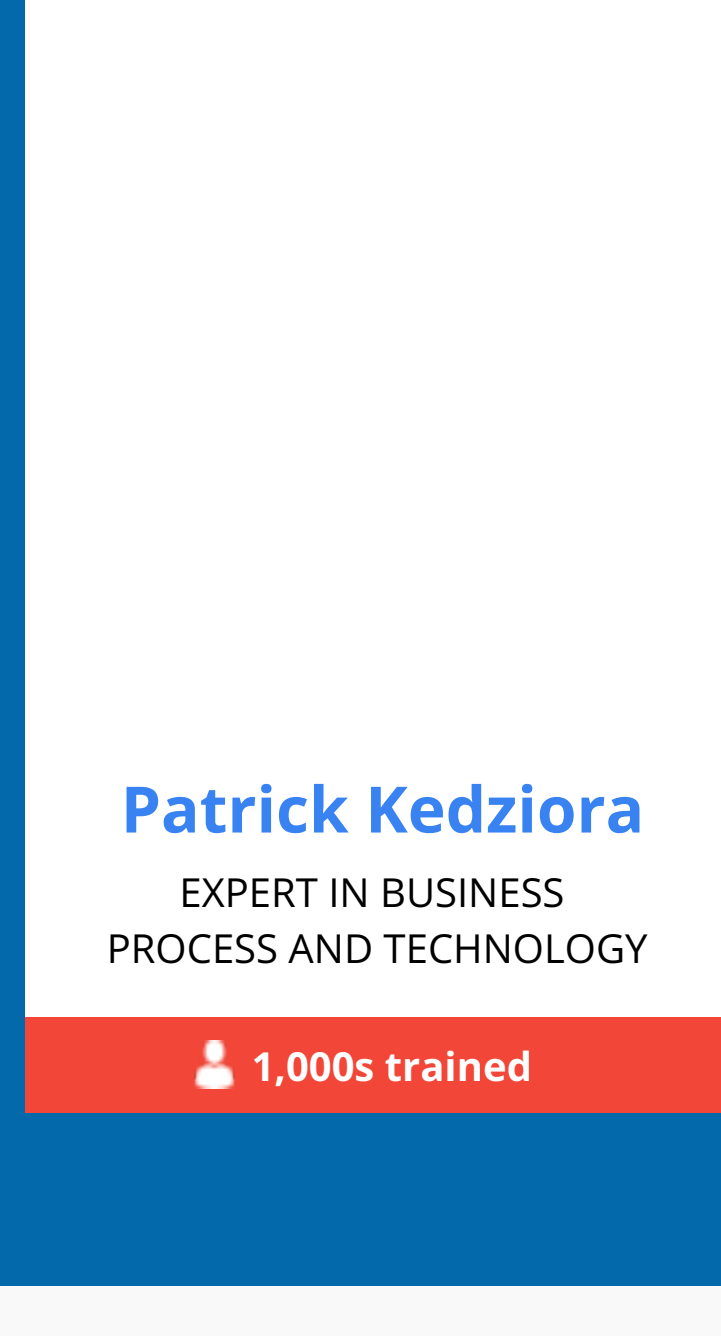

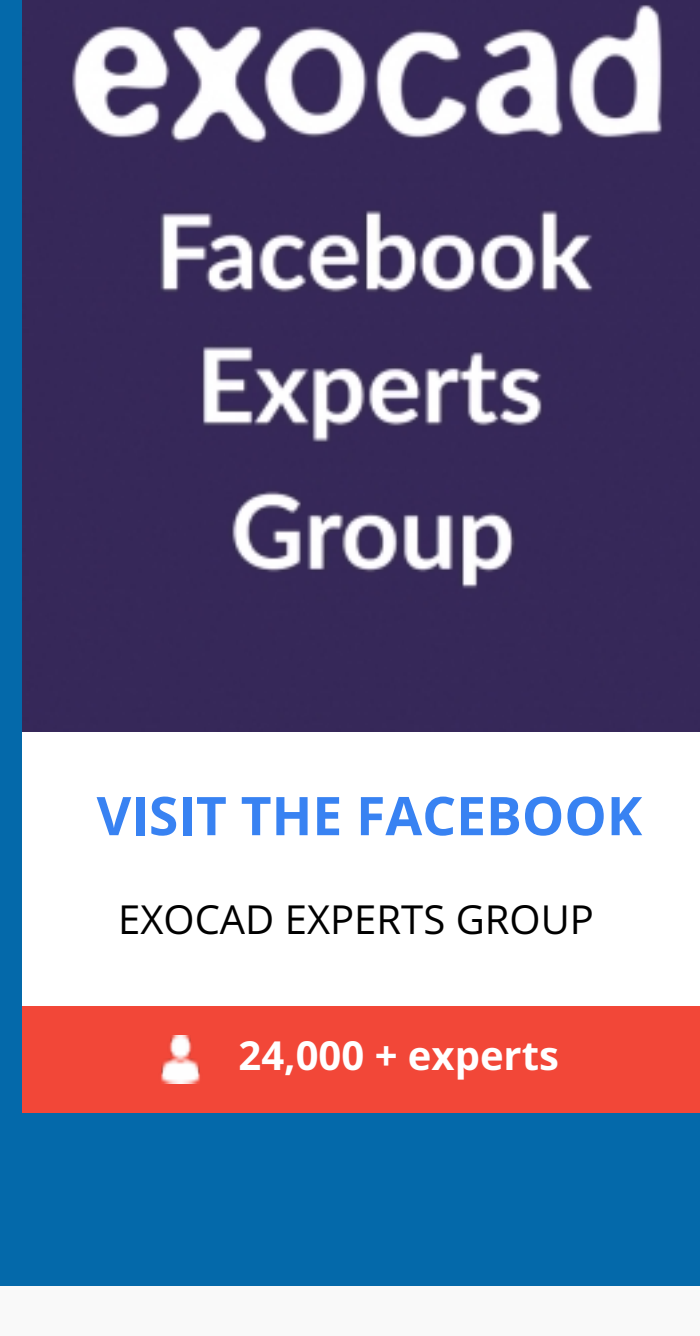

This course is for all dental technicians that want to **earn more money** by being **certified.**

And, become part of this exclusive community.

Testimonials

Dental Arts Laboratories, Inc. consists of 12 total locations. Throughout, we have 28 total design stations ... all exocad. The software is so versatile; intuitive enough for our entry level designers to quickly get to grips with, while powerful enough for our veteran CAD designers and their most complex cases.

Axel Kufner,

Since the Digital Revolution began in the lab industry, we have used almost every available dental CAD program on the market. What myself and my team love most about exocad is its intuitiveness in the hands of dental technicians, its flexibility when designing complex restorations, and its ability to integrate easily with other open platform solutions.

Alwin Ngai,
Chief Operating Officer
Modern Dental Group Ltd.,
Shenzhen, China
2000 Employees

When we went digital with exocad we had no prior CAD/CAM experience, and got fully up to speed with CAD/CAM in just a few days. exocad for us was, and still is, very straightforward and user friendly.

Since going digital with exocad, we have been able to expand our customer base, and have grown our business exponentially.
